- Developed "Hots," a content discovery engine to combat user choice paralysis on streaming platforms. The application, built with React and Tailwind CSS, features a 'Reels-style' vertical feed of movie trailers. An integrated Machine Learning model personalizes content based on user likes, aiming to significantly boost platform engagement and improve the user experience.

• Multiplayer Snake Game

- Developed a modern, web-based multiplayer Snake game, allowing multiple users to compete simultaneously in a shared game session. The interactive user interface was built with React and styled with Tailwind CSS. Player movements and scores are synchronized in real-time using Firebase, with a Node.js server managing the core game state for a seamless user experience.
